- This is based upon a starting bank of \$10,000 on the 1st September 2009 and adherence to our suggested position sizes and entry and exit points.
- Results are *not* compounded.
- \*These results are hypothetical trading results. The entry and exit prices quoted in these results were the live market prices at the time advisory communications were sent to clients. The exact price at which clients traded these recommendations will vary, as will the size of the position. These are some of the limitations of relying on hypothetical results. Equity CFD results are net of 0.1% brokerage, and spreads have been taken into consideration for Forex & Index CFD trades. Please note that fees, commissions, and spreads vary between brokers, and clients actual result may vary from these hypothetical results due to differing trading costs. Please be aware that past performance is not a reliable indicator of future returns
- The figures of Forex and Indices are net of spread. i.e. there is no brokerage on Forex or Indices as all costs are included in the spread.
- "S/T, M/T and Position" refers to a prior methodology of position sizes which reflected trade sizes of \$1,250, \$750, and \$500 respectively.
- From the 1/10/2010, TRUMarkets utilised an exact position (margin) size. For share CFDs, this is the number of share CFDs to trade. For Forex, the number of FX lots and the cost in Australian dollars.
- From 4<sup>th</sup> April 2011 the ASX200 index results are the combined weekly result.
- The results are believed to be true and accurate; TRUMarkets does not accept any responsibility for any errors and omissions.
